# RoseBox

## Comprehensive range!

The new rose plastic RoseBox range sets a completely new standard in Drill and Tool Cassettes.

### Modular Concept

Primarily there is a comprehensive product range, whose modular construction offers a vast selection of cassettes of various types and sizes, but in the same consistent form and appearance, and all available with the most varied range of inserts.

### Perfect Material

Using the highest quality impact resistant ABS plastics, we are able to produce lightweight but extremely sturdy cassettes. The plastic cassettes concede nothing to the traditional metal cassettes by way of strength and durability, but they offer so much more in the way of design and technical refinement.

### Modern Design

In RoseBox our designers have created a masterpiece! Functional and user-friendly, with soft, rounded lines, the RoseBox compliments any quality, professional tools.

### Numerous applications

In many sizes and with the most varied range of inserts, the RoseBox is ideal for ...

- **Sets of all kinds of drilling tools**  
HSS-Drills, Masonry Drills, SDS Drills, Taps, Step Drills, Sheet & Tube Drills
- **Precision- and Shank Tools such as Countersinks, End Mills, Burrs etc.**
- **Special sets of tooling, Measuring tools, etc.**
- **Spare Parts**

**The RoseBox range offers a wealth of advantages:**

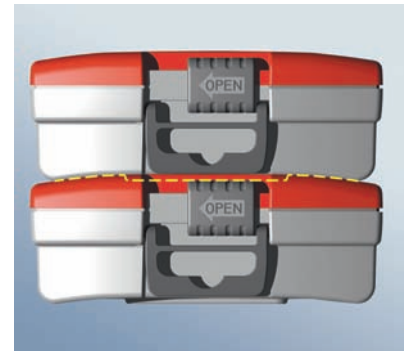

### Integral Closure

An integral 'slide closure', recessed into the side and thereby protected, offers utmost safety (won't open accidentally when falling down). Also available with 'anti-pilferage system' – please enquire.

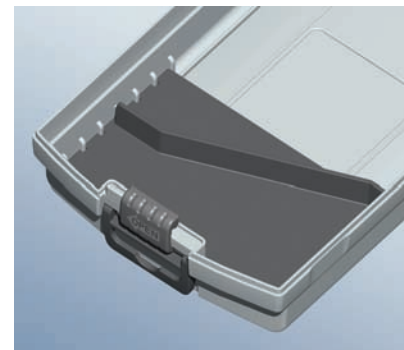

### Excellent Stacking

The curved shape of the cassettes combined with labelling areas, recessed in the lid and raised in the base, provides simple but very stable stacking.

### Length 'stop'

Adapted to the pop-up inserts – also available with ratchet mechanism for variable positioning (to suit the contents of the cassette).

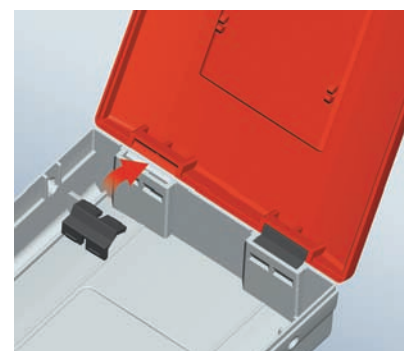

### Fixing of accessories

The length 'stop' can be modified to include clips or space for possible set accessories (e.g. centre punch etc.)

### Durable Hinges

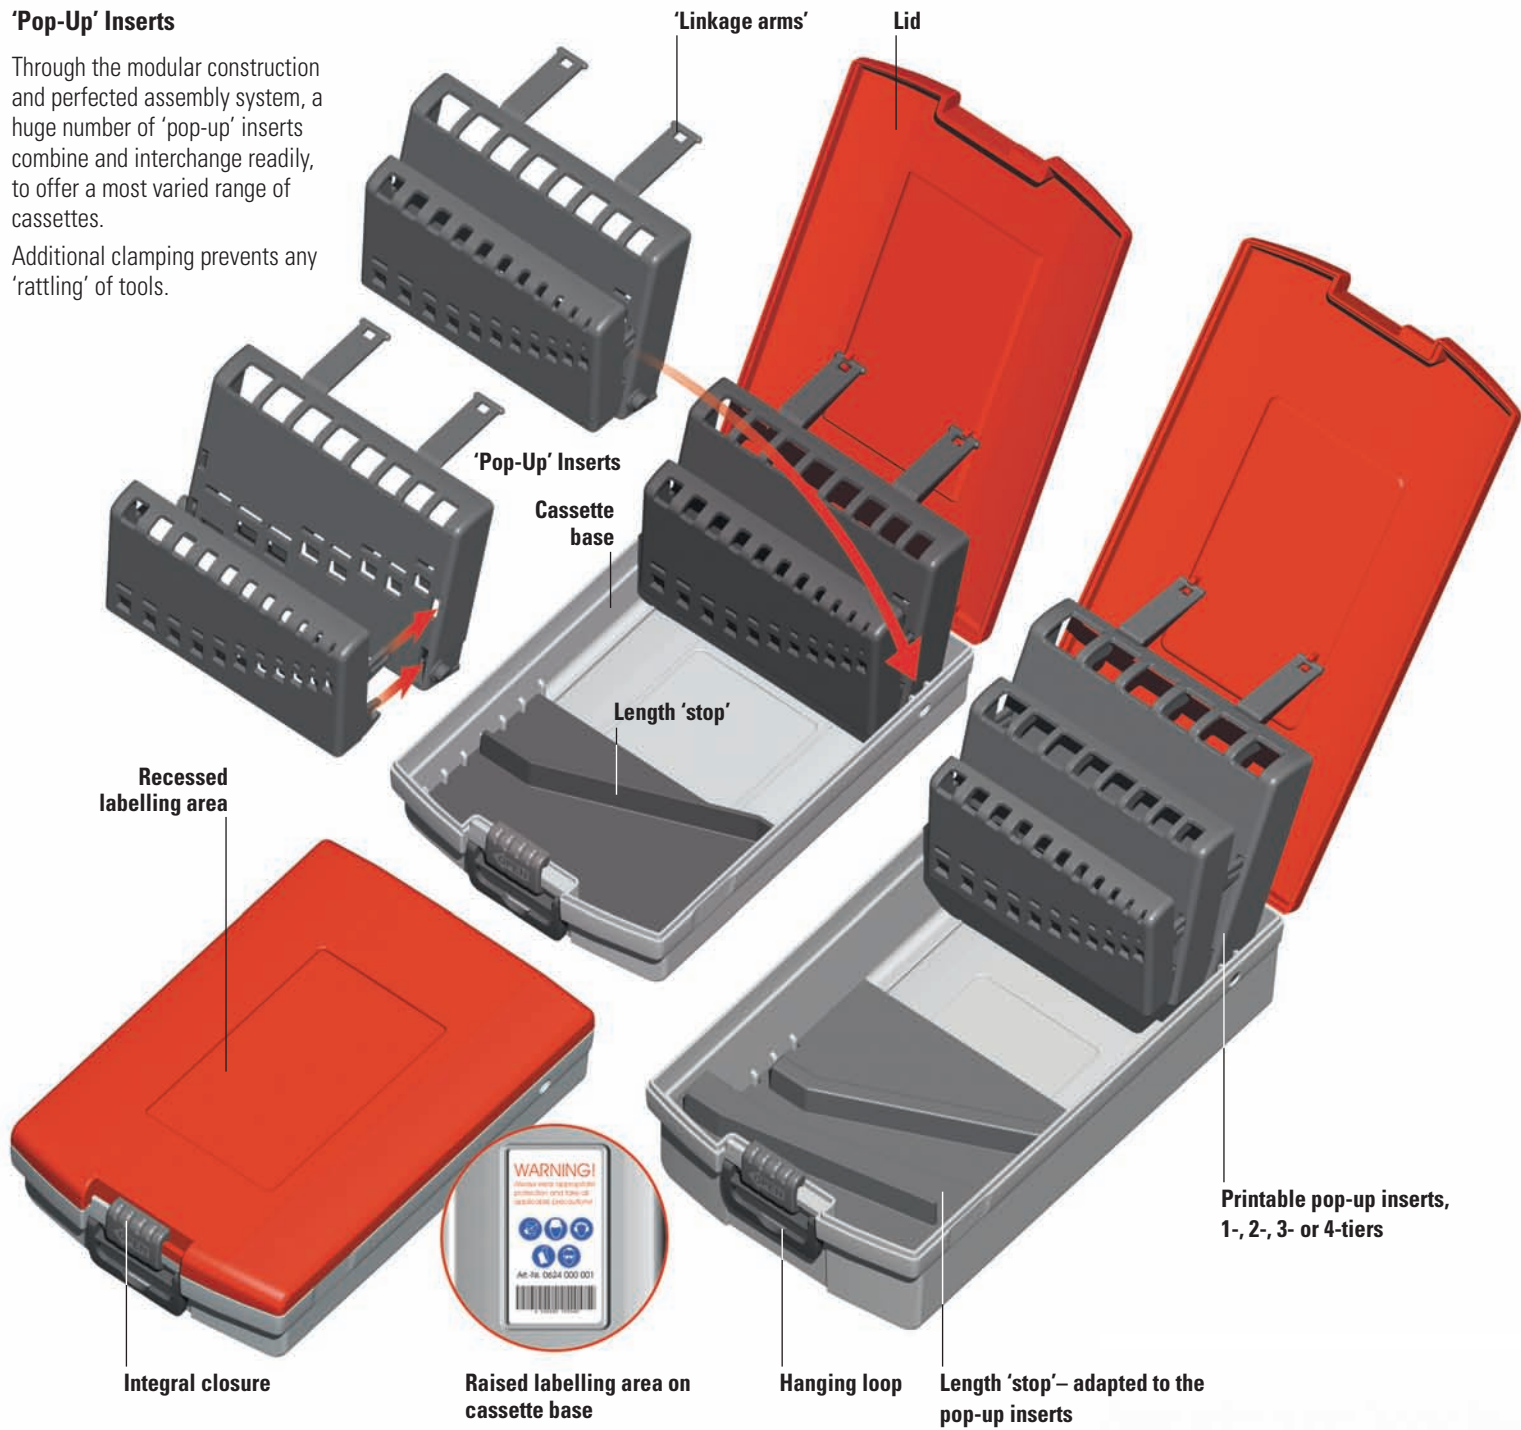

Lid and base are connected with hinges made of extremely durable polyamide material.

### 'Pop-Up' Inserts

Through the modular construction and perfected assembly system, a huge number of 'pop-up' inserts combine and interchange readily, to offer a most varied range of cassettes.

Additional clamping prevents any 'rattling' of tools.

### Lid

The recessed area provides easy application and protection for the label. Where quantities justify it, inserts in the mould can be made, to emboss text into the actual cassette.

### Cassette Base

The cassette bases are available in various heights, to suit the contents.

The raised 'border' aids easy application of the label.

### Tool Inserts

The RoseBox does not serve only as a traditional drill cassette – many other options are possible using custom foam or vacuum formed inserts.

## A growing range!

For all available sizes and types please refer to the enclosed data sheet.

## NEW: RoseBox with clear window

For special presentation purposes a window can be integrated into the cover.

Thus, the customers can evaluate the products already inside the boxes.

Available in the 5 basic sizes. Additional accessory like foam inserts or thermoformed inserts for further applications possible. Please enquire.

### Stock items:

- Bases in grey 3
- Lid, closure and hanging loop in grey 9
- Insert and length 'stop' in black
- Print on insert: white

**NEW: Size 1A** 120 x 87 x 36 mm

**Size 2B** 146 x 100 x 42 mm

**Size 3A** 172 x 115 x 42 mm

**Size 4A** 200 x 115 x 42 mm  
**Size 4B** 200 x 115 x 58 mm

**NEW: Size 5B** 200 x 167 x 65 mm

### Unlimited options for colour combinations

Subject to quantities, customized colour combinations - using rose plastic standard colours - are possible for both the cassettes and individual cassette components.

## Current Sales Range

Issue July 2010

Further versions, colours and colour combinations are in planning stage; possible on request.
