and organization system in one solution**

StorePack

Well packed ...

SUSTAINABLE PACKAGING & STORAGE SYSTEM

...perfectly organized and safely stored...

StorePack is a modular packaging, sales and organization system that can be adapted to individual needs and requirements of the user. This smart packaging has been developed to be used as storage, after application as packaging and sales tool. Therefore StorePack scores regarding sustainability.

Well organized in seconds

Using the system is simple: Your products are packed into the handy modules and promoted at the POS. Once the items have been selected by the customer they simply need to add the packaging to their drawer or transport box with one click onto the base pad. The base pad can be cut in a pattern of 15 mm to fit any drawer or storage system.

The flexibility of the base pad means it can be used in a variety of ways. Combined with the RoseCassette the StorePack system can be used to display and transport a range of products. Whilst keeping them perfectly safe and organized.

Designed and ideally combinable

The stackable modules are available in various dimensions and two heights. Some modules have the option of an euro hanger for retail display purposes. The individual modules are easy to insert and remove from the base pad.

All StorePack modules have the option of a transparent lid to secure and protect the content.

To complete the StorePack system, the customer will again choose a product, which is packaged in a StorePack module. Ideally you offer your customers empty modules for the supplement of his order system.

For long-term use

The StorePack system is produced in ABS which is a robust and high-quality plastic. Available colours for the modules are black and white, with further colours available on request. The lids are available in transparent.

Euro hanger - can be labelled, ...

folded ...

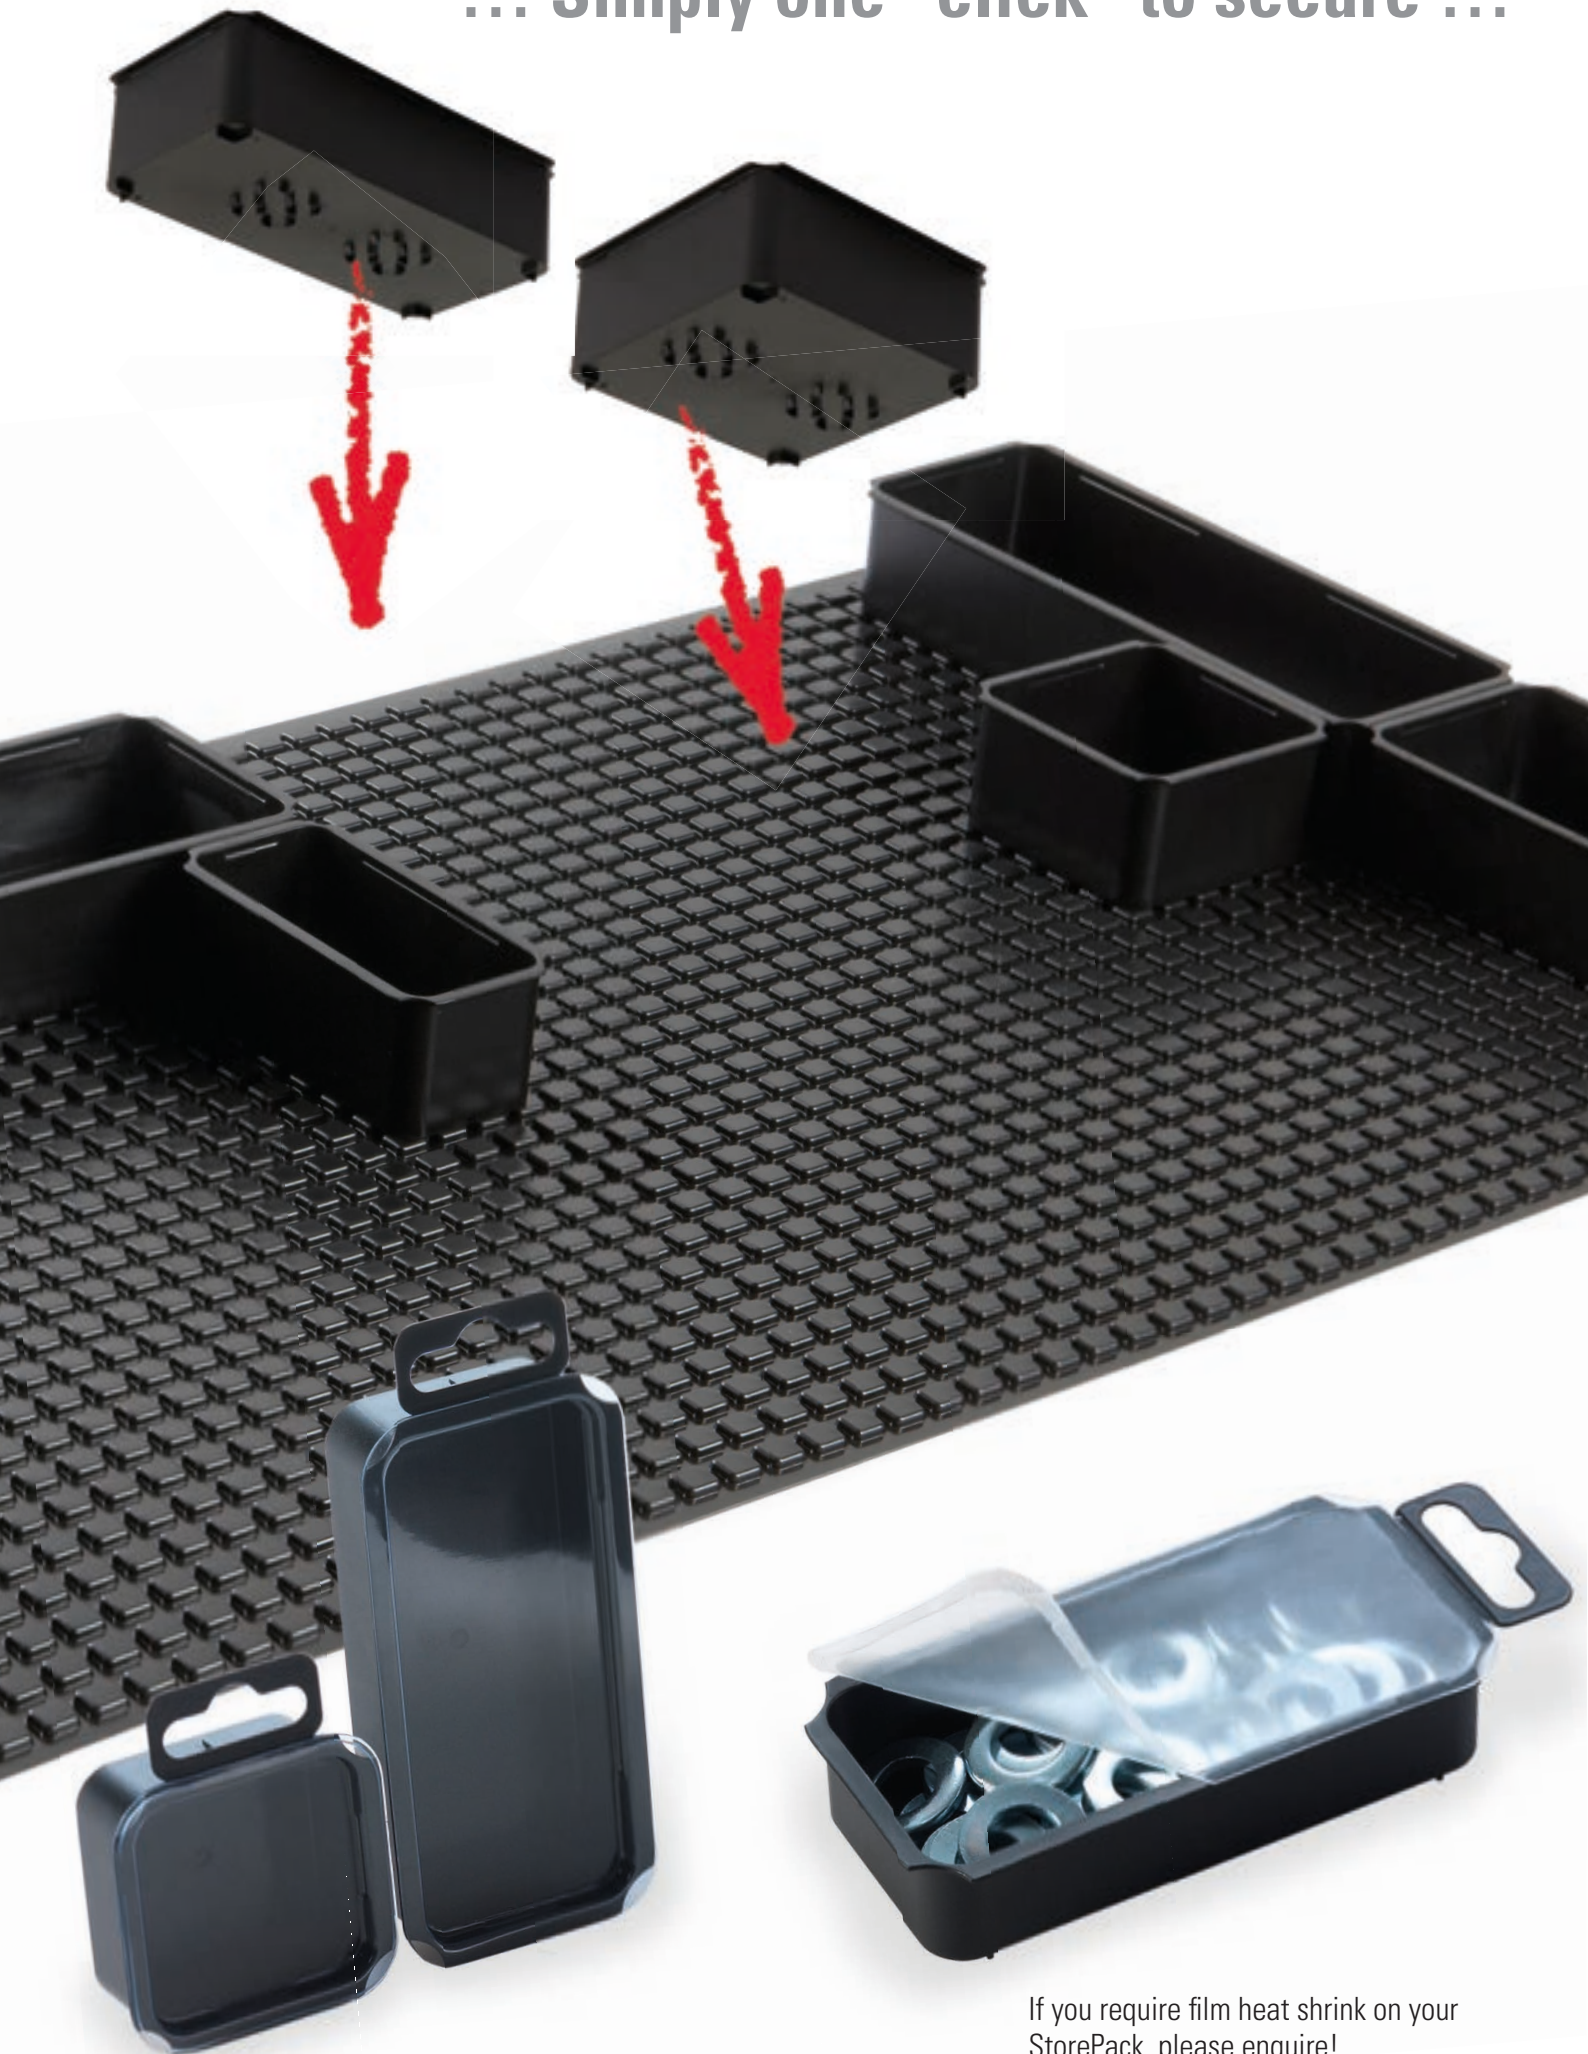

or easily removed.

Easily stackable with or without the lid.

... Simply one "click" to secure ...

If you require film heat shrink on your StorePack, please enquire!

... reusable ...

Rounded edges are designed to allow you to conveniently remove individual modules.

...clean, sorted, clearly...

... even during transit!

Easily adaptable:

1

2

3

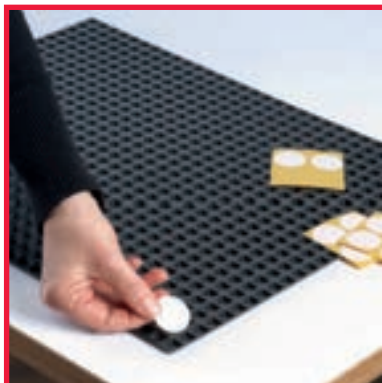

1 Measure space.

2 Score the base pad.

3 Break off the excess base pad.

4

5

6

4 Add adhesive tape.

5 Place and secure it.

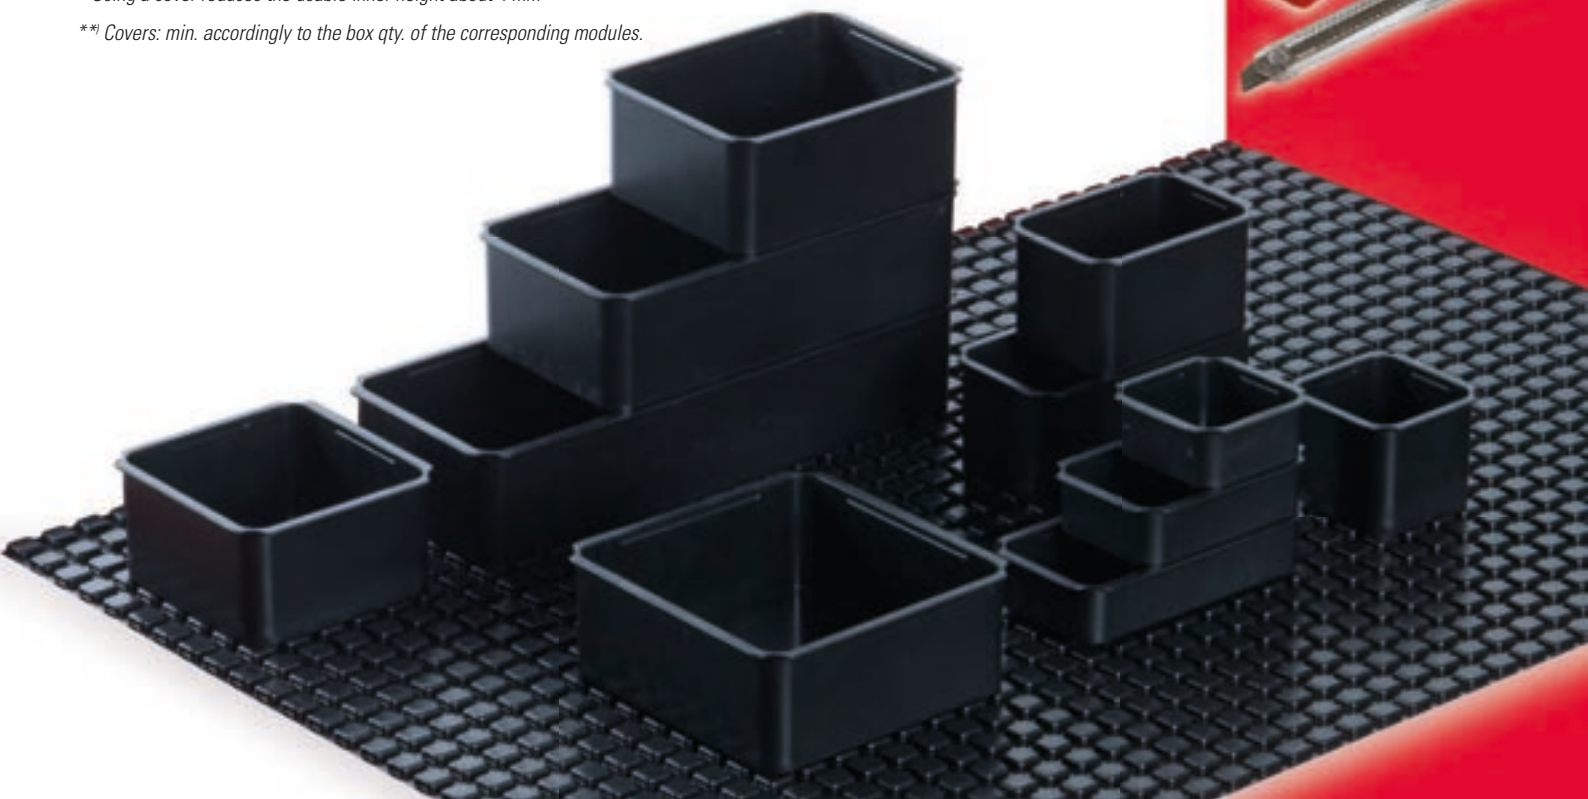

6 Position the modules.
